BIostatistician

M D

\$75,000

Biostatisticians analyze data and statistics on living things collected during medical research studies to draw conclusions or make predications. They may also contribute to the design and execution of research studies in collaboration with other statisticians and scientists.

ENVIRONMENTAL Health Specialist

B M

\$53,000

An environmental health specialist is a general term for someone who inspects environmental health systems to make sure they are in compliance with local, state and federal regulations. These regulations are set by the government to keep citizens safe and healthy.

EPIDEMIOLOGIST

M D

\$70,000

Epidemiologists are public health professionals who investigate patterns and causes of disease and injury in humans. They seek to reduce the risk and occurrence of negative health outcomes through research, community education, and health policy.

INTERNATIONAL Health Specialist

M D

\$69,000

Global health specialists work to improve public health for people worldwide. They typically specialize in health disorders that affect people across the world, such as HIV, infectious disease, aging-related problems, pre-natal health, and sexually transmitted diseases.

PREVENTATIVE MEDICINE

D

\$135,000

Health promotion, research and disease prevention.
